

DISINFECTING SMALL OFFICES LOCKER ROOMS & BATHROOMS

GOAL

- To eliminate odours in small offices locker rooms and gyms.

APPLICATIONS

- Any building with a small room sports room, locker room, gym or arena.

Sanuvair® S300

AIR PURIFICATION SYSTEM WITH HEPA FILTER

Ideal for buildings that often struggle with the indoor air quality, smell of sweat and moisture in locker rooms.

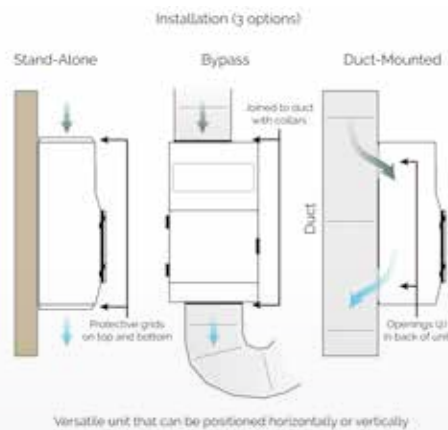

By recirculating the air, the unit eliminates odours and bacteria thanks to a combination of filters and UVV oxidizing and UVC germicidal lamps. A recirculation rate of 6 to 8 times per hour is recommended for this unit.

BENEFITS

- + Eliminates odours
- + Improves air quality
- + Purifies from 200 to 300 cubic feet per minute

Unit Dimensions:
17" x 30" x 12"
